Problem Solving Worksheet

Team:	Date:
Members Present:	
What is the problem? Define the problem as a data-based discrepancy between what is expected and what is occurring. Include peer and benchmark data.	
Why is this problem occurring? Use data to determine an evidence-based hypothesis.	
What interventions have already been attempted? Indicate whether each was successful or not and what data were used to make that determination.	
What research- or evidence-based intervention(s) will be put in place now?	
When will the intervention(s) begin?	
Who will be responsible for implementing the intervention(s)?	
Who will be responsible for supporting the interventionist? In what ways will support occur?	
How will the intervention(s) be monitored?	
How will you measure the success of the intervention(s)?	
In what ways has parent input been solicited and considered?	
When is the next meeting that this will be discussed?
